

*A new generation of infrared
sauna rooms.*

TyloHelo's CarbonFlex® heating system uses organic carbon far-infrared technology from Japan — to provide the most relaxing and most therapeutic infrared saunas available.

In today's lifestyles most of us don't actively sweat on a daily basis. Numerous medical studies show that deep sweating has multiple health benefits. Regular bathing in a Far-infrared sauna by TyloHelo provides the benefits derived from a deep sweat.

When using a TyloHelo far-infrared sauna you perspire more quickly and more profusely (and thus get greater benefit from the sweating process) and you feel more completely heated, literally enveloped in soft, radiating heat. It's a product that not only feels good — it's good for you.

FAR-INFRARED SAUNA

DETOXIFY. RELIEVE ACHES & PAINS. REDUCE STRESS.

TYLOHELO

WHAT IS A FAR-INFRARED SAUNA?

A TyloHelo Infrared sauna provides soothing heat, directly radiated to the body, with very little time waiting for preheating.

TyloHelo's revolutionary CarbonFlex® heating system ensures soft heat, fully surrounding the bather. With infrared heating panels literally spanning wall-to-wall, the heat radiates in a wide angle from each wall so the heat is spread evenly within the cabin space.

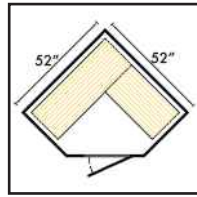

THREE MODELS TO CHOOSE FROM:

TyloHelo's Far-Infrared saunas are designed for easy installation, easy use, and have design features to fit your taste and budget. All three models have plug-in portability.

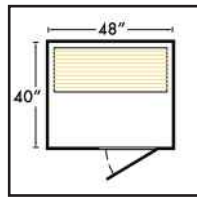

G970, 5-SIDED, 3-PERSON IR SAUNA

- Dimensions: 52" x 52" x 75" H
- Electrical Requirements: Plug-in, 15 amp 120-volt outlet

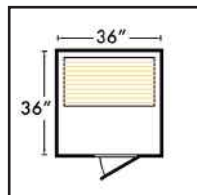

G920, 2-PERSON IR SAUNA

- Dimensions: 40"D x 48"W x 75"H
- Electrical requirements: Plug-in, 15 amp 120-volt outlet

G910, 1-PERSON IR SAUNA

- Dimensions: 36"D x 36"W x 75"H
- Electrical requirements: Plug-in, 15 amp 120-volt outlet

EACH TYLOHELO INFRARED SAUNA INCLUDES:

- TyloHelo CarbonFlex® heating panels, integral with wall panels and bench support panels—with the largest surface area in the industry, providing the softest heat, evenly dispersed from all sides
- Prefabricated wall panels, finished interior and exterior with clear T&G Canadian Hemlock—for a sauna with "furniture quality."
- Fast assembly with no tools—with wall panels mounted onto an easy-fit base and topped with easy-fit ceiling panel.
- TyloHelo digital control mounted inside the sauna. Control features include: on/off, interior light switch, time and temperature controls.
- Bluetooth sound system with low profile heat resistant speakers
- Pre-built Hemlock benches
- Built-in Hemlock floor
- Deluxe all-glass door. All sidelight windows and doors use only tempered safety glass.
- Low-voltage mini-spot lights installed in the ceiling.
- Wall-to-wall backrests, designed for user comfort and safety.
- All sizes can be plugged into a 120 volt household outlet.
 - CarbonFlex® heating system's large surface area efficiently emits soft heat with quick heat-up times, yet is simply plugged into a standard 120-volt household outlet (no electricians required).
- ETL listed "as a complete plug-in room"—for safety and reliability
- Industry leading warranty backed by America's #1 sauna company.

CarbonFlex® INFRARED HEATING SYSTEM:

One of the most common complaints about IR saunas is the uncomfortable sensation of "cold spots" in the sauna where no IR heat waves reach the body, and "hot spots" when seated directly in front of the old-style ceramic or metallic IR heaters. Due to the huge surface area of the CarbonFlex® heating panels, the heat is evenly dispersed and the surface temperature of the heaters is comfortable to the bathers. More importantly, the large surface area creates the perfect IR wavelength.

The design of our saunas and the integral CarbonFlex® panels ensures better performance—well within the so-called "Vital Range" of 7 to 14 microns, with most of the wavelength within the sauna being in the 8.4 to 9.4 microns.
